

The Voluntary Carbon Tax Witness group sent \$739.70 to Phung Tuu Boi from our Sept 30 collection, to plant Moringa trees in Vietnam, in an area severely impacted by Agent Orange, and as a way to counteract climate change (through trees) as well as to provide nutrition and economic benefits. We have just received this report and these photos from Vietnam showing the results of the work.

Dear Pr. Roger Conant,

I would like to send you some words about planting tree project. After 2 months of preparation for the planting of Moringa tree project in A Luoi, there have been some results now :

1 Training course at Dong Son Commune for Introducing the value of the Moringa tree:

How to plant and care for trees

Create seedlings in nurseries.

We had soup from Moringa leaves, people enjoy

2- Dong Son Commune has received 300 seedlings were bought in Hue and transport to A Luoi district with cost: 30.000 VND / tree that include transportation, the seedlings are planted in 30 family gardens and Vegetable Garden of Kindergarten [Roger's note: 30,000VND = \$1.37 US]

3. With the aim of many households received Moringa seedlings, we bought Moringa 's seeds, Create some small nurseries at commune Dong Son ,

The plan, in 2016 April, will have 2,000 seedlings

The seedlings will be distributed to 150-200 households. with low cost and no transportation, to help people to improve and enhance their lives. .

We know , The work was very hard and lack of funding .

We hope to receive your continued help

We are very thankful and promise to do better..

May the New Year bring you an abundance of the good things of life

Sincerely yours

Phung Tuu Boi
